## **CERTIFICATE OF ANALYSIS**

| Product:               | RSV-DsRed5 virus   | Product Number:       | R135   |
|------------------------|--|-----------------------|--|
| Parental Strain:       | RSV A2   | Lot Number:           | 1539   |
| Cells for Propagation: | HEp-2 (ATCC CCL-23)  | Virus Passage Number: | 4  |
| Quantity:              | 2 x 1.2 ml (±10%)  | Titer:                | $6.7 \ \text{log}_{10} \ \text{TCID}_{50}/\text{ml}$ |
| Preparation:           | Cleared infected cell supernatant  | Suspension Medium:    | EMEM, sucrose, L-glutamic acid                       |
| Manufacture Date:      | 12/17/2017   | Biosafety Level:      | 2  |
|                        |  |                       |  |
| Sterility:             | Bacteria, yeast, fungi, and Mycoplasma were not detected by our assay methods.   |                       |  |
| Shipping and Storage:  | This product is shipped frozen with dry ice. Store at –80°C upon receipt. Avoid multiple freeze-thaw cycles as loss of viral titer may occur.  |                       |  |
| Recommendation:        | Before use, rapidly thaw frozen vial in a water bath set at 37°C and then keep on ice. Use pre-cooled medium/buffer for virus dilution and keep on ice before inoculating into cell culture. For future use, aliquot into small amounts and freeze rapidly in a dry ice/alcohol bath and store at -80°C. |                       |  |
| BIOHAZARD:             | This virus preparation contains LIVE VIRUS and should be handled in accordance with biosafety guidelines defined in NIH-CDC HHS Publication No. (CDC) 93-8395.   |                       |  |
|                        |  |                       |  |
